Similar challenges

- High pressure on development
- Small municipalities; large group of summer season residents
- Exceptional natural archipelago
- Opportunities and possibilities
- Common history of working jointly politically
- Strength in unified approach

Values making northern Bohuslän attractive

- Nature and the country scenery
- Cultural history values
- Living, populated, active coastal villages

Blue Masterplan

The plan will cover the area from the coastline all the way out to the swedish territorial border (12 nm from the baseline). The outer part will be worked out jointly with a swedish national marine masterplan.

The plan will be made in close cooperation with local businesses and organisations thereby providing both means and visions for development along with an environmental focus and a non-destructive approach.

Open collaborative process

- Multiple year process following PBL (legal basis)
- Three open hearing periods
- Politically governed process

Structure plan accepted in 2010

Coastal zone planning:

In each structure the municipalities have agreed on an important basis for formulating common planning decisions.

SHARED VALUES FOR SPATIAL PLANNING

EUROPEAN COMMISSION

DIRECTORATE-GENERAL FOR MARITIME AFFAIRS AND FISHERIES

Maritime Spatial Planning in
Small Sea Spaces
Portorož - 15 & 16 March 2018

The blue structures

WE AGREE:

- that open sea forms transboundary water which carries national and global responsibilities
- that resource use shall be done with the environmental goals in focus.
- that fishing, shipping and energyproduction are important priorities for our municipalities
- that risks in connection to shipping shall be given attention.

WE AGREE:

- that the archipelago is the basis of our unique nature and culture and their inherent value even in a national perspective.
- that a living, populated and active archipelago is one of the most important requisists for our attractiveness.
- that the public shall have access to the beach zone.
- that aquaculture shall be performed with respect for the great natural and cultural value which the archipelago carries.
- that risks in connection to shipping shall be given attention.
