

# MED-MSP-CoP Recommendation paper

---

HYBRID WORKSHOP – 29 JANUARY 2025

# Structure

## 1 - CoP emergence

⇒ Brief history

## 2 - CoP work carried out so far

⇒ Synthetic summary: topic/subtopic selection, workshops, webinars

## 3 - Challenges, solutions and perspectives

⇒ MPA/MSP: Involvement of maritime sectors in marine conservation

⇒ SBE-MSP: MSP as a strategic framework for SBE

## 4 - Recommendations for the future work of the MED-MSP-CoP

⇒ Functioning, objectives, connections...

# Challenges, solutions and perspectives

## 1/ Challenge identification

MPA-MSP / Involvement of maritime sectors in marine conservation → 6 challenges

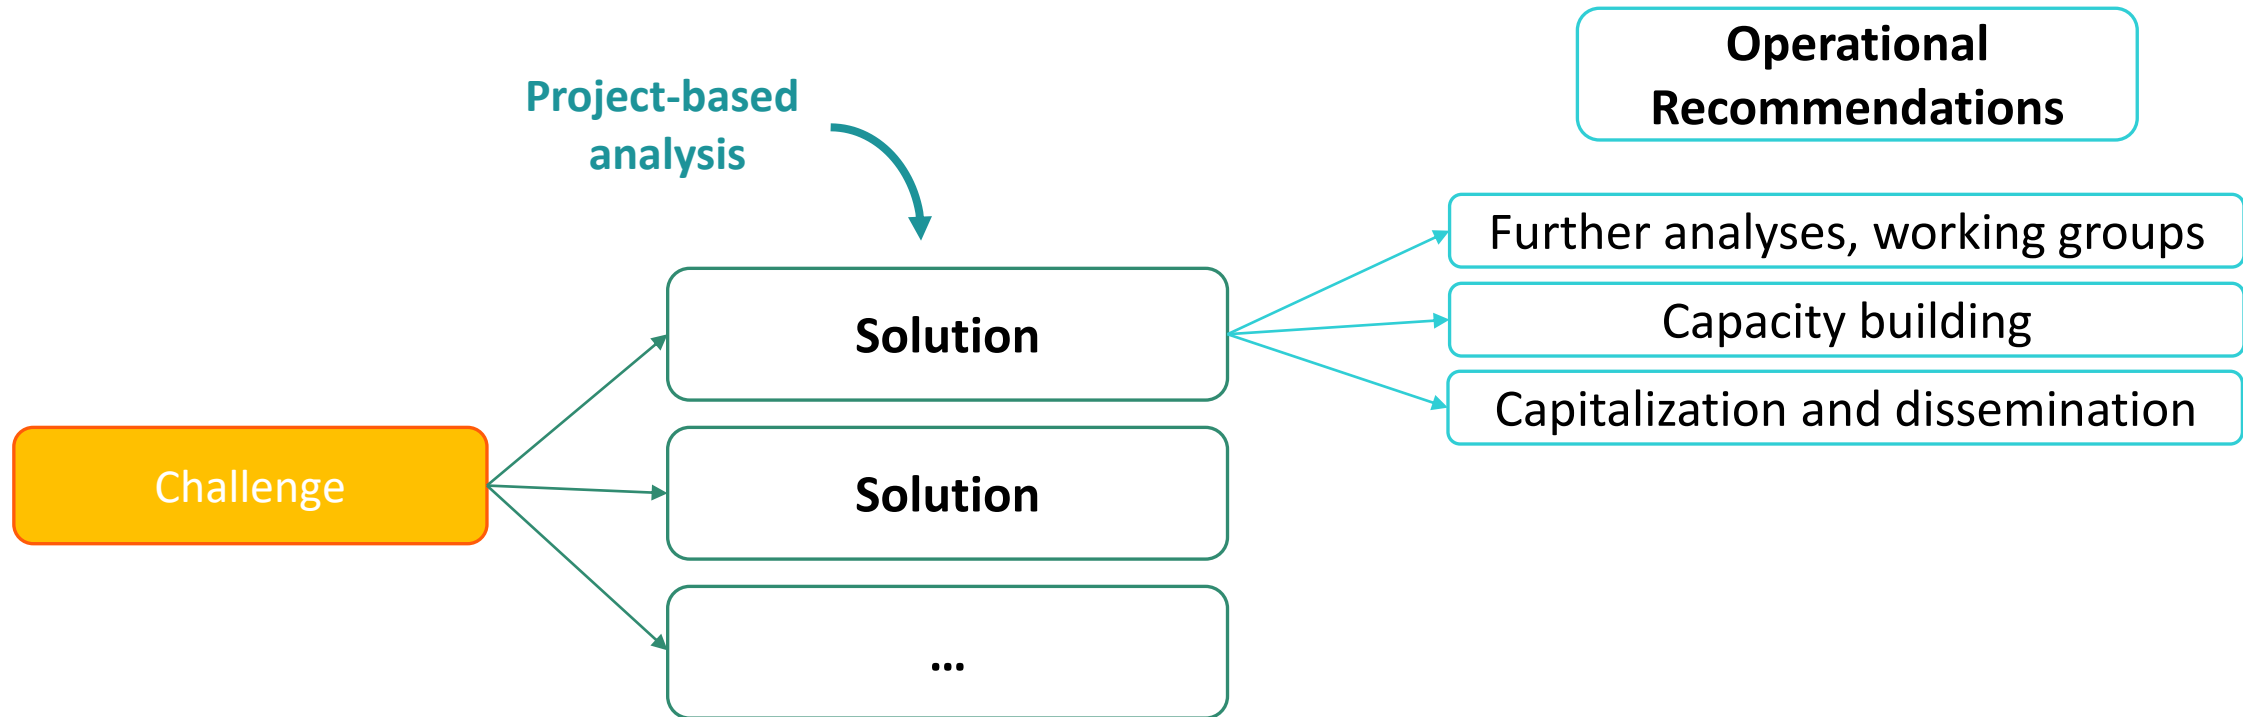

SBE-MSP / MSP as a strategic framework for SBE → 7 challenges

## 2/ Solution identification (from projects)

Scenario building	Recommendations
Situation analysis	Governance
Methods	Cross-border collaboration
Data and tools	Communication / Awareness raising
...	...

# Challenges, solutions and perspectives

# Challenges, solutions and perspectives

Challenge	Solution	Operational recommendations		
		Working groups / New studies	Capacity building	Capitalization (disseminating solutions)
1. Valuation and spatialization of economic and social values for maritime sectors	<b>Data and tools</b> ReMAP project: module regarding socio-economic data		Capacity-building workshops to explain how to use ReMAP modules	Dissemination of ReMAP toolkit
2. Valuation of economic impacts and benefits of environmental management measures	<b>Methods</b> Mapping ecosystem services: ReMAP project: ecosystem service mapping tool. Modules. AMARE project: monetized evaluation of ecosystem services provided by Posidonia meadows. MPA Europe project: Ecosystem classification, blue carbon database, species richness tool	Benchmark on the ecosystem services mapping methods developed so far and assessment of usefulness for MSP	Training for ecosystem service mapping appropriate methods and the use of newly established digital tools	Methodological handbook Guidelines to organise data collection to implement the method
	<b>Methods</b> Climate change : MEDIX, MSP4BIODIVERSITY and MPA Europe projects: modelling of CC refugia			Report on Methods developed, potential use and limitations.
...				

# Challenges, solutions and perspectives

## Participatory session

- ⇒ 2 groups (or 2 x 2 groups)
  - Involvement of maritime sectors in marine conservation
  - SBE-MSP: MSP as a strategic framework for SBE
- ⇒ Objectives
  - Comment on assessments and proposals in the tables
  - Suggest extra solutions and recommendation
  - Synthesize perspectives for each challenge
