

# MSP Data Framework

TEG sub-group4

Maria Katsika, Alessandro Sarretta, Vassilis Gekas,  
Stefano Menegon, Kamil Rybka, Danel Norton,  
Andrej Abramic, Technical Expert Group on MSP data

# MSP Data framework v1.2

- ▶ National MSP processes:
  - ▶ Poland, Greece (Cyprus), Italy, Sweden, France.
- ▶ EU projects:
  - ▶ PLASMAR, MarSP, MSP MED, SIMCelt, SIMNORAT, SIMWESTMED, SEAnse, SIMAtlantic, MED OSMoSIS, eMSP NBSR

# Socio-economic information & Governance information

**Socio-economic information**  
(coastal population, unemployment, income by sector...)

**Governance information**  
Competence on marine/coastal areas  
(administrative units...)

## **Socio-economic information**

**Socio demographic**  
Population, (un)employment, income

**Economical information**  
Income related to maritime/coastal sector, N of jobs related to coastal/maritime sector

## **Governance information**

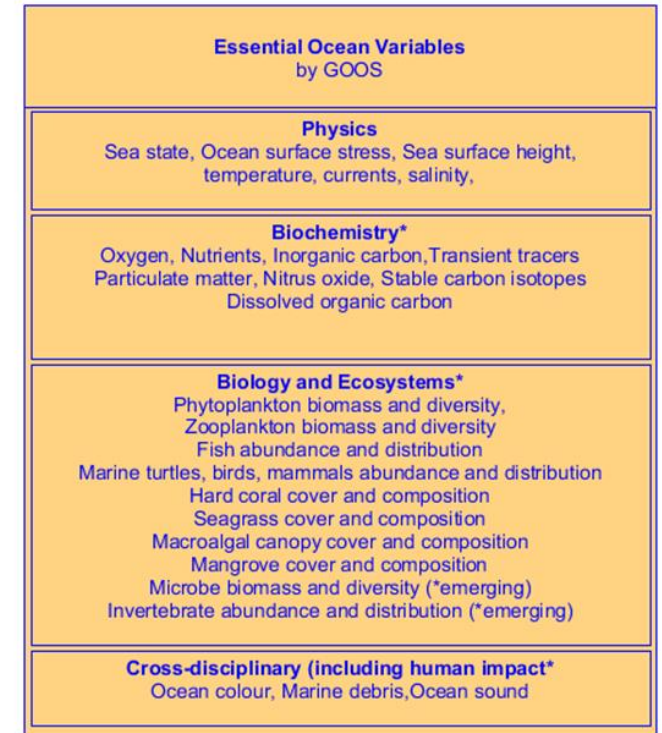

**Administrative competence**  
Continental Shelf, Exclusive Economic Zone, Contiguous Zone, Territorial Sea, Internal waters  
Maritime Activities  
Coastal Activities

**(Inter)National conventions/legislations, policy**  
UNCLOS,  
International Convention on Maritime Search and Rescue (SAR)  
Atlantic Action Plan

# Data cluster description structure

- ▶ **Cluster description, what spatial information should consist and why is relevant for the MSP process, data collection, monitoring and/or assessment;**
- ▶ **Structure of the cluster - how parameters within the cluster can be structured, following already established framework (e.g. Good Environmental Status of Marine Strategy Framework Directive 2008/56/EC, or Essential Ocean Variables) or even listed;**
- ▶ **Available “digital“ resources for data management and harmonization, as potential data models (e.g. INSPIRE, OGC, International Hydrographic Organization) including registers (e.g. SeaDataNet,) and related code lists;**
- ▶ **(Harmonized) data products delivered by the European data initiatives (e.g. EMODnet, Copernicus...);**
- ▶ **Draft of the report will be shared with TEG, previous to be finalized and published**

## Oceanographic characteristics and climate Essential Ocean Variables (GOOS) or EMODnet physics parameters Climate variables

Mediterranean Sea SST Cumulative Trend (1993-2020)
